SOURCE

1. All attempts made between 17 and 20 April 1951 to find the site of an engineer equipment depot, supposed to be located in Meissen, were in vain. A large lumber yard was seen near the barracks installation at Zaschendorf on the eastern border of Meissen. Numerous logs, 2.5 to 6 meters long, were piled up there. Logs, six meters long, were being unloaded at the yard on 18 April 1951. \*

25X1C

- \* ~~Source~~ Comment. The lumber yard seems to be of only local importance. It is obviously used by the engineer unit stationed at the Zaschendorf barracks installation. There are no indications that a sizable engineer equipment depot exists in Meissen.
